Join two-year college and university faculty from across the nation to explore the power of Small-Scale Chemistry: a cost effective, innovative, integrated approach to laboratory science.

Tracks include:

- An introductory overview to Small-Scale Chemistry.
- Administrative and Financial issues of laboratory science.
- New Experiments and techniques for using SSC in research.
- Exemplary regional programs for implementation and dissemination of SSC.

Come see how beautiful Colorado is in the summer:
- Hotel rates are $71 per night at the University Park Holiday Inn (1 block from campus.)
- Conference registration as low as $120 (includes five meals.)
- Optional recreational program and post-conference trip are available.
